

Connecticut Septic Contractor License Roadmap

Subsurface sewage disposal system installer

ContractorLicenseRequirements.com — verified 2026-09-30

Step-by-step roadmap

1. Identify the applicable installer pathway

Four installations means qualifying documented system work, not four minor service or repair visits.

2. Prepare the qualification records

Submit the notarized application, photograph, and \$50 application fee. The application requests local-health verification of four qualifying installations within the past five years, including leaching-system work. Minor repairs are not qualifying installations. DPH also describes review of certain out-of-state credentials.

3. Complete the applicable assessment and filing

DPH requires its installer examination after the application requirements are met. Confirm the examination appointment and any additional charges directly with the program.

4. Obtain the project approvals

Identify the permitting authority for the property, secure the required approved plans and construction authorization, and arrange inspections before covering the work. Keep the occupational credential separate from the site approval.

5. Track the applicable renewal requirements

The application warns that the full annual renewal fee becomes due at the first renewal in the licensee's birth month, even when that occurs in the issuance year. The \$50 application charge is not presented here as the renewal amount.

Pre-application checklist

- Work scope and responsible authority identified
- Applicable qualification records prepared
- Required examination, training, and application completed
- Current fee and insurance requirements checked
- Site approval and inspection arrangements obtained
- Actual credential expiration and renewal requirements recorded

Key figures

Application fee: \$50.00

Examination: Required

Examination fee: Not established; confirm with provider

Initial license: Not established; see fee guidance

Renewal: Not established; see fee guidance; every 1 year(s)

Estimated total cost: The cited installer application establishes a \$50 application fee. It does not establish a complete examination, issuance, or renewal budget.

Time to license: Depends on the selected pathway, qualification review, and local project approvals. No complete end-to-end timeframe is established here.

Fee scope: The cited installer application establishes a \$50 application fee. It does not establish a complete examination, issuance, or renewal budget.

Renewal details: The application warns that the full annual renewal fee becomes due at the first renewal in the licensee's birth month, even when that occurs in the issuance year. The \$50 application charge is not presented here as the renewal amount.

Continuing education: Confirm the education requirements for the actual credential or local authorization. No unverified number of continuing-education hours is quoted here.
